

Help Create Safe Streets for Everyone

Nash/Tres Pinos/Sunnyslope Road & McCray Street

Complete Streets Plan

Community Walk & Design Workshop

Join your friends and neighbors and share your ideas to:

- Improve conditions for travel by foot, bike, bus and car.
- Enhance circulation.
- Beautify the street.

Complete Streets are streets that are designed with users of all types and abilities in mind: pedestrians, cyclists, transit riders, seniors, school children, people with disabilities, and motorists.

A professional design team will translate your input into solutions to improve safety and mobility for people of all ages and abilities along and across the Nash/Tres Pinos/Sunnyslope corridor.

The team will also work with you to develop ideas for the future of McCray Street.
